Professional Summary

Python Full Stack Developer with 6 months of hands-on experience developing web applications using Python, Django, Django REST Framework, React.js, and MySQL. Experienced in building RESTful APIs, database-driven applications, and authentication systems. Solved 300+ LeetCode problems, demonstrating strong problem-solving and algorithmic skills. NPTEL certified in Python for Data Science. Passionate about developing reliable, scalable web applications.

Technical Skills

- **Programming Languages:** Python, JavaScript
- **Backend & Frameworks:** Django, Django REST Framework, JWT Authentication, RESTful APIs
- **Frontend:** React.js, HTML5, CSS3, JavaScript ES6+, Responsive Design
- **Databases & Tools:** MySQL, SQL, Git, GitHub, Postman, Render, Netlify

Professional Experience

Python Full Stack Developer Intern Jan 2026 – Jun 2026
PySpiders Training Institute Bangalore, Karnataka

- Engineered a full-stack medical data extraction system using Django REST API, React.js, and MySQL, processing 500+ documents daily with 92% OCR accuracy using Pytesseract
- Developed a responsive React.js frontend with drag-and-drop file upload, real-time progress tracking, and structured data visualization, ensuring 100% mobile compatibility across devices
- Collaborated with team members on code reviews, conducted debugging sessions, and implemented clean code practices following PEP 8 standards, reducing technical debt and improving maintainability
- Developed a File Arranger System using Python (os, shutil libraries), an automated file organization utility processing 1000+ files in under 5 seconds with intelligent categorization

Projects

Medical Data Extraction Web Application Live Demo

- Backend: Django REST Framework with custom API endpoints, JWT authentication, and Pytesseract OCR integration for image-to-text conversion with 92% accuracy
- Frontend: React.js with responsive UI/UX, real-time file upload with progress bar, and data export functionality
- Database: MySQL with optimized indexes, reducing query time by 35% and supporting 500+ daily document uploads
- Deployment & Performance: Render (backend) and Netlify (frontend), 99.2% uptime, 0.5s average API response time, handling 100+ concurrent users

File Arranger System GitHub Repository

- Built a Python automation tool using os and shutil libraries that intelligently organizes files into categorized folders (Documents, Images, Videos, Audio, Archives, Code)
- Performance: Processes 1000+ files in under 5 seconds, handles duplicate files and special characters in filenames, and creates folders dynamically with comprehensive error handling

Education & Achievements

B.Tech in Computer Science & Engineering May 2022 – Jun 2026
Sagar Institute of Research & Technology (RGPV), Bhopal CGPA: 7.6/10

- NPTEL Certification: Python for Data Science by IIT Madras (Completed with 51 Percentile) – Covers Python fundamentals, data analysis, and visualization
- LeetCode Achievement: Solved 300+ coding problems covering arrays, strings, hash maps, and recursion, demonstrating strong problem-solving abilities. Profile: leetcode.com/u/Govindpatel55
