PROFILE SUMMARY

Highly motivated MERN stack developer with a strong foundation in building scalable, full-stack applications. Certified in the MERN stack by Apna College, with hands-on experience in creating full CRUD functionality applications like the 'Wonderlust' travel planning web app. Proficient in Node.js, Express.js, React, and MongoDB, and committed to leveraging technical skills to solve real-world problems and contribute to innovative development projects

TECHNICAL SKILLS

Primary Skills : MERN(Mongo DB ,Express Js ,Node Js, React Js)

Languages : Core java , Basics Of JavaScript , SQL , Python

Technologies : Data Structures and Algorithms (DSA), RDBMS, NoSQL, REST APIs, Git, Version Control, Problem Solving, Query Optimization, Object-oriented programming.

Projects

1-WONDERLUST

Wonderlust is a full-stack travel planning web application inspired by Airbnb, designed to help users explore destinations and manage accommodation listings. Built using Node.js, Express.js, MongoDB, and EJS, the platform provides full CRUD functionality, allowing users to create, view, edit, and delete listings seamlessly. The project leverages Tailwind CSS for a responsive, modern, and user-friendly interface. Developed following the MVC architecture, Wonderlust offers a clean, scalable structure that enhances maintainability and performance

2-FILE-ARRANGER SYSTEM

The File Arranger System is a Python-based automation project that organizes files in a directory based on their type, extension, or custom rules. It automatically categorizes documents, images, videos, audio, and other file formats into separate folders, reducing clutter and improving file accessibility. The system leverages Python's os and shutil modules to perform file handling operations efficiently, file system management, and Python scripting while solving a real-world problem of manual file organization.

ACHEIVMENTS

- Cloud Computing Internship (InTrainz): Completed industrial projects and earned an excellent performance recommendation.
- Solved 300+ problems on coding platforms like Leetcode and codechef.
- Successfully cleared the NPTEL Certification Exam with a score of 60 %, in (Python For Data Science)

EDUCATION

- AISSCE (12th Grade) - CBSE Board | NVIS | Hoshangabad | 2022 | 69% |
- AISSE (10th Grade) - CBSE Board | NVIS | Hoshangabad | 2020 | 63% |
(Bachelor of Computer science & Engineering)
- Engineering University
•Rajeev Gandhi Proudhyogiki Vishwa Vidyalaya

June 2022 - June 2026
Bhopal , India
